Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 January 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1, 3, and 6-15 are rejected under 35 U.S.C. 102(a) as being anticipated by Applicant's admission in section [0003]-[0009].

In sections [0003]-[0009] of the instant application, Applicants admits that the process and the materials of the above claims are "well known". The described hydrophilic surface of the template and the composition of the imprinting material meet the instant claim limitations.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2, 4, 5, and 16-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's admission in view of 3M Product information from the 3M website.

The admission by Applicant that the materials and methods instantly claimed are well known has been discussed above, however, the reference employs a polymeric fluorine-containing surfactant, ZONYL®, but fails to teach the use of NOVECTM FC-4432.

Art Unit: 1752

The 3M product information sheet for NOVECTM FC-4432, teaches that the surfactant is a non-ionic polymeric fluorochemical surfactant for use in radiation curable organic polymeric coating systems to reduce the surface tension and excellent in wetting.

Given the teachings of the references, it would have been obvious to prepare the well known materials described by Applicant in the background of the instant invention, choosing to replace the ZONYL[®] surfactant with the NOVECTM FC-4432 surfactant, with reasonable expectation of achieving a high density imprint.

Conclusion

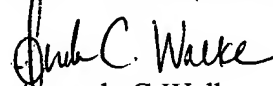

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Chou et al (6,309,580) and Robinson et al (US 2002/0135099) are cited for their teachings of similar materials.
